

Please do not allow cell phone usage on aircraft. I have been a cell phone user for almost seven years. I respect the rights of others by refusing to use my phone in public areas. I am a frequent flyer and do not want to sit next to or near persons who will use their phones just because they can. Airline flights are stressful enough because of limited personal space, crowded conditions and security measures. Do not add another stressor. I believe a person can do without cell phone access for a few hours. Nothing is so immediate that warrants cell phone usage on aircraft.
